

***“Dreams & Dedication!”***

## About Us

MetPharm Biotech Pvt. Ltd is involved in the development & marketing of pharmaceutical products. We export API, Intermediates & Formulations to many countries. Since the year of its formation; MetPharm has shown significant growth year after year.

## Promoter Profile

MetPharm aims to achieve its mission under the guidance of visionary promoters amongst whom one is a legend of the Indian pharma critical care market and a management expert and other is a dynamic leader with out of the box strategies & path-breaking leadership qualities. Both the promoters decided to move up their value chain and has set up MetPharm Biotech Pvt. Ltd mainly focusing on a wide portfolio of products and launching good products through the company.

| Mission                                                                             | Vision                                                                              | Goal                                                                                  |
